

# Noti.Hana

Hana — a sofa designed with comfort in mind. Hana is a collection that stands out for its uniquely soft structure. Its modular elements form personal spaces to work and relax.

---

The sofa comes in many different options, varying in terms of two heights. The lower, armrest can be comfortably used in different positions. The armrest also serves as a divider between two adjacent seats, thus creating private zones in a shared space. The tall version provides an acoustic shield, making it a perfect choice for interiors such as open office spaces, where privacy matters and users need to stay focused.

---

With its modular design, the Hana collection can be arranged in different ways, as two-seater spaces or three-seater separate micro-environments, easily adapted to the diverse needs of the users.

---

Hana combines comfort, functionality and flexibility, enabling both privacy and socialising in shared spaces.
