

# Noti.Topo

Topo is a modular sofa collection inspired by the contour lines of topographic maps. Varying heights of seats, backrests, and armrests form a distinctive layered structure that reflects the natural spatial logic of a landscape. This concept is translated into a soft, architectural seating form that combines visual depth with comfort.

---

Topo modules function as independent islands that can be freely combined. Backs, armrests, side tables, mediaports, and planters allow for configurations suited both to everyday domestic use and to the demands of contract and public spaces.

The rounded base and horizontal stitching further emphasize the sofa's layered structure, giving it a distinctive, topographic character.

---

The design was created with comfort and an easygoing lifestyle in mind. Soft, inviting proportions and a true “sink-in comfort” make Topo an ideal place for rest, meetings, and everyday relaxation.

---

Topo is a flexible system: it evolves with the user, the interior, and changing needs, offering virtually unlimited arrangement possibilities.

---

## Technical description

---

### Armchairs, sofas

---

Base	Steel tube legs, powder-coated black (RAL 9005), with anti-slip feet
------	--

---

Seat	Panel construction, rigid base, pocket springs, polyurethane foam
------	---

---

Backrest	Panel construction, polyurethane foam
----------	---------------------------------------

---

Back cushions (loose)	The filling consists of a blend of silicone fibre and shredded polyurethane foam. The filling is enclosed in a cotton fabric inner layer and finished with an outer layer made of the selected fabric or leather
-----------------------	--

---

### Accessories

---

Armrest, table	Upholstered lower section. Top made of glued oak panels.
----------------	--

---

Plant stand	Upholstered lower section. Top made of glued oak panels. Inside, three plastic plant pot inserts.
-------------	---

---

## Technical description

---

Table attached to upholstered furniture

Top made of glued oak panels. Steel bracket made of sheet metal, powder-coated.

---

Mediaport

Mediaport with one power socket and one USB-C charger. Made of plastic with a powder-coated steel housing.

---

Notes

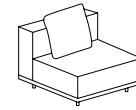

The backs of armchairs and sofas are designed for use from both sides, allowing backless elements to be placed on the opposite side and arranged as two sofas with back support. Loose back cushions are included as standard with furniture featuring backs; cushions for backless elements are available separately if required. Due to the use of plastic feet, the furniture cannot be connected using linking elements. The added softness of upholstered furniture may lead to the appearance of visible creases on its surfaces. The extent of creasing depends primarily on the type and stiffness of the fabric and does not constitute grounds for warranty or complaint claims.
