Baps

Baps is a collection of poufs that shows that the power of design often lies in simplicity. Composed of clean, geometric cylinders available in three sizes, the collection is defined by a deliberate restraint of form. It is the detail that gives it its distinctive identity.

The signature feature of the collection is a subtle cuff wrapping around the lower part of each pouf. This decorative finish of the cover breaks the minimalist silhouette and softens its form. Below it, the plinth is finished in black eco-leather. This discreet element not only enhances the proportions of the piece but also protects its base from dirt and everyday wear.

Each model is also available in a mobile version fitted with small castors. This allows Baps to adapt effortlessly to the changing rhythm of the interior, ranging from informal collaboration areas to flexible workspaces and lounge environments.
